

Brown Bag Series: *Blueprint for Business Success*
October 10, 2012

“How Hackers Compromise Your Security and What You Can Do About It”

The use of wireless networking has become readily available throughout the world. Countless businesses, government agencies, academic institutions and telecommuter workers have deployed wireless networks in their computing environment. As a result, those organizations and individuals have opened up their networks to data thieves, vandals and hackers.

The real danger starts with the business that may not accurately assess the risks involved in the deployment of wireless technologies. Lulled into a false sense of security, many organizations believe the risks associated with their wireless connectivity is minimal based on the belief that these wireless signals only extend to the four walls of their organization or facility. You will learn:

- Why a false sense of security is creating rampant insecurity in wireless networks
- How easy it is for anyone with a computer and wireless card to breach these networks
- What you can do to protect your network

Mr. Robinson will demonstrate the tools and techniques that hackers are using every day to compromise the security of numerous enterprises and consumers. He will also share specific guidance you can immediately put to use to raise the bar of organizational awareness and mitigate the risk that your wireless network will be the next stepping stone into sensitive corporate data and computing resources.

This month’s facilitator: Anthony Robinson, Cerberus Computing Services

Facilitator: Anthony Robinson comes to the Flathead valley with over 25 years of computer security experience. He has worked with well know companies such as USN, IBM, Sun Microsystems, General Electric, Fidelity Investments, IKEA and Omnicare Clinical Research facility from the east coast New York and Philadelphia area.

Monthly *Blueprint for Business Success* brown bag sessions feature business professionals facilitating informative discussions. Attend to receive relevant information, opportunities to ask questions of the professionals, and network with peers.

Who should attend? Employers interested in growing and evolving more effective organizations. Why?

- Utilizing all available resources to operate and grow makes for smart business.
- Exchanging ideas, insights, and real-world solutions directly impacts your bottom line.
- Making better decisions quickly requires more and better information
- Engaging and energizing your staff helps make your business more successful.

Date: Wednesday, October 10, 2012
